Getting started with conditionals

Read in one character from STDIN.
If the character is 'Y' or 'y' display "YES".
If the character is 'N' or 'n' display "NO".
No other character will be provided as input.

Input Format

One character

Constraints

The character will be from the set $\{yYnN\}$.

Output Format

echo `YES` or `NO` to STDOUT.

Sample Input

```
y
```

Sample Output

```
YES
```
