## Java Loops I

## Objective

In this challenge, we're going to use loops to help us do some simple math.

## Task

Given an integer, $N$, print its first 10 multiples. Each multiple $N \times i$ (where $1 \leq i \leq 10$ ) should be printed on a new line in the form: $\mathrm{N} \times \mathrm{i}=$ result.

## Input Format

A single integer, $N$.

## Constraints

- $2 \leq N \leq 20$

## Output Format

Print 10 lines of output; each line $i$ (where $1 \leq i \leq 10$ ) contains the result of $N \times i$ in the form:
$\mathrm{N} \times \mathrm{i}=$ result.

## Sample Input

2

## Sample Output

```
2 x 1 = 2
x 2 = 4
x 3 = 6
x 4 = 8
x 5 = 10
x 6 = 12
x 7 = 14
x 8 = 16
2 x 9 = 18
2 x 10=20
```
