

Matching Word & Non-Word Character

\w

The expression **\w** will match any word character.

Word characters include alphanumeric characters (*a-z*, *A-Z* and *0-9*) and underscores (*_*).

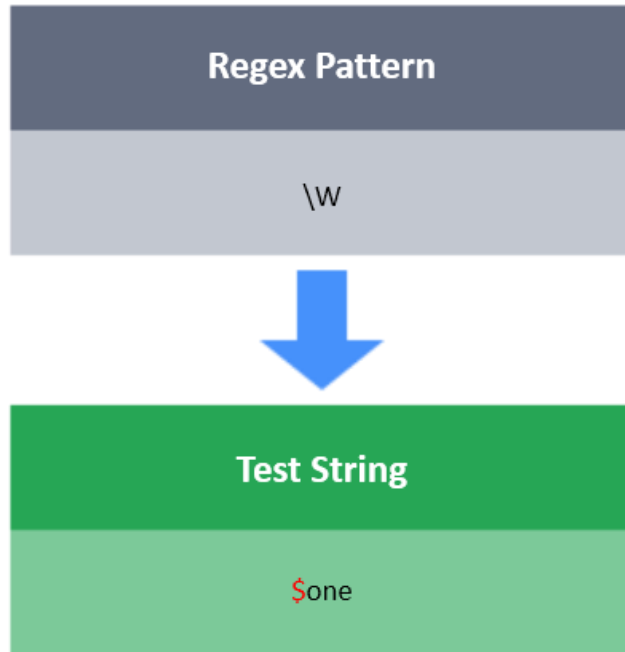

In the above image, Regex Pattern is matched with the Test String.

\W

\W matches any non-word character.

Non-word characters include characters other than alphanumeric characters (*a-z*, *A-Z* and *0-9*) and underscore (*_*).

In the above image, Regex Pattern is matched with the Test String.

Task

You have a test string *S*. Your task is to match the pattern *xxxXxxxxxxxxxxXxx*
Here *x* denotes any word character and *X* denotes any non-word character.

Note

This is a regex only challenge. You are not required to write any code.
You only have to fill the regex pattern in the blank ().
