Cut #2

Display the 2nd and 7th character from each line of text.

Input Format

A text file with N lines of ASCII text only.

Constraints

- $1 \leq N \leq 100$

Output Format

The output should contain N lines. Each line should contain just two characters at the 2nd and the 7th position of the corresponding input line.

Sample Input

Hello

World

how are you

Sample Output

e

o

oe
