# Tree: Postorder Traversal 

Complete the postOrder function in the editor below. It received 1 parameter: a pointer to the root of a binary tree. It must print the values in the tree's postorder traversal as a single line of space-separated values.

## Input Format

Our test code passes the root node of a binary tree to the postOrder function.

## Constraints

$1 \leq$ Nodes in the tree $\leq 500$

## Output Format

Print the tree's postorder traversal as a single line of space-separated values.

## Sample Input

$\square$

## Sample Output

```
4 3 6 5 2 1
```

## Explanation

The postorder traversal is shown.
