Project Euler #10: Summation of primes

This problem is a programming version of Problem 10 from projecteuler.net

The sum of the primes below 10 is 2+3+5+7=17.

Find the sum of all the primes not greater than given N.

Input Format

The first line contains an integer T i.e. number of the test cases. The next T lines will contains an integer N.

Constraints

- $1 \le T \le 10^4$
- $1 \le N \le 10^6$

Output Format

Print the value corresponding to each test case in separate line.

Sample Input 0

```
2
5
10
```

Sample Output 0

```
10
17
```

Explanation 0

- ullet For N=5, we have primes as $\{2,3,5\}$ and the sum is ${f 10}.$
- For N=10, we have primes as $\{2,3,5,7\}$ and the sum is 17.
