

HACKERRANK INNOVATORS

HackerRank  + **Revolut**

Revolut is the world's first truly global financial superapp. Their mission is to help customers improve their financial health, empower them to have more control, and promote financial cohesion across communities.

Data Analyst

“

HackerRank's Developer Skills Platform tremendously increases the speed of our recruitment process and helps with maintaining healthy and fast-moving pipelines. All candidates receive a standardised experience which helps ensure consistency in the quality of assessment from a hiring manager perspective.

Revolut

Revolut relies on HackerRank to hire top talent for a wide range of developer roles as part of its recruitment assessment process

Python Software Engineer
