HackerRank's ease of use has not only helped our team identify great candidates beyond their resume, but also allowed us to deliver a clear and seamless candidate experience.

**Secure and foolproof**, no other platform has given us this level of guaranteed enterprise security when we're holding remote tests. HackerRank's platform is robust and has scaleable proctoring and plagiarism checking features built in.

## Why we love HackerRank:

HackerRank is doing all the heavy-lifting for our recruiters so that we can do what we do best: getting to know the candidates inside out and building long-lasting trust.
